

e-line

The Little Big Kiosk

Slim, smart and elegant, the e-line kiosk with its small footprint, clean design and straight lines is an ideal platform for various self-service kiosk application.

Standard hardware configuration includes a 17-inch TFT, LCD monitor with integrated touch screen, stereo speakers with amplifiers and an Intel based computing platform, all fitted in a 2.5 inch deep sheet metal enclosure made from high strength steel and painted with oven baked epoxy hardened paint.

Optional equipment includes 19-inch LCD monitor with touch screen, industrial grade keyboard with touch pad, swipe type card reader and proximity sensors.

e-line packs the power of a full size kiosk in a small and elegant package. The small form factor makes e-line the choice kiosk for deploying at conference room and waiting area in the corporate world. In the retail sector the small size of the kiosk save prime real estate and yet delivers all the advantages of a self-service machine. Ideal for deploying proven self service application such as information dispensing, web surfing and electronic visitor registration at public events.

The appearance of the kiosk can be customized to meet customer specific requirements of look and feel.
