# THE DIEBOLD ADVANTAGE

Diebold's government solutions team is committed to providing high quality physical security products. We dedicate ourselves to providing significant investments in new product development, providing the highest level of customer service, sales and technical support to our customers.

## **CUSTOMER SATISFACTION**

Diebold's employees are committed to total customer satisfaction. With more than 14,000 employees worldwide, our motto of "innovation delivered" encompasses our commitment to our customers.

## **SALES SUPPORT**

In addition to our outside sales force, Diebold maintains an inside sales staff with complete product knowledge and information to assist you with your product needs and inquiries. Pricing and product information requests are answered in the most timely manner.

## **SERVICE**

Diebold's service staff is one of the industry's largest, most comprehensively trained service forces. With more than 4,500 professionals in 600 locations worldwide, our service team is there to ensure your equipment is working properly and that your satisfaction is complete.

## **PARTS**

Diebold has more than 400 service centers across North America. Service outside North America is managed by Diebold and Diebold business partners.

## **WORLDWIDE DISTRIBUTION**

In addition to North America, Diebold has distribution through wholly-owned subsidiaries or majority-owned joint ventures in every major country throughout Europe, the Middle East and Africa, Latin America and in the Asia-Pacific region.

# ABOUT US

For 150 years, Diebold has been the company many industries have called on for the most reliable and comprehensive security solutions. From the strength and security of the safes and vaults we first manufactured in 1859, to the technology-based integrated electronic security systems, software, and service we provide today, Diebold's commitment has always been to develop practical solutions for our customers unique needs.

Diebold serves the Federal Government, state & local government and transportation and utility industries by providing the security products and solutions that these customers rely on to protect our nation's people and most precious assets.

In 2001, Diebold was selected by the National Archives in Washington D.C., to construct new vaults to secure original manuscripts of the Declaration of Independence, the Constitution and the Bill of Rights. The project was completed in September 2003 and involved the creation of three room-sized vaults made of concrete five times stronger than ordinary road-grade material.

Diebold, Incorporated is now safeguarding the foundation of America's history, the Charters of Freedom: the U.S. Constitution, the Declaration of Independence and the Bill of Rights, in three customized high-tech vaults installed at the National Archives building in Washington, D.C. The recently renovated rotunda and re-encasement of the Charter documents was unveiled to the public on Thursday, September 18, 2003.

The archive renovation included an overhaul of the security system safeguarding the charters and eliminated the steps in the Rotunda so these important documents of American history are accessible to all visitors. The transformation also included a redesign of the permanent exhibit cases so all four pages of the U.S. Constitution are prominently displayed.

Diebold protects everything from countless amounts of currency to the world's most precious gem, the Hope Diamond at the Smithsonian Institution.

To complement the installation of Diebold's vaults, Diebold also installed a state-of-the-art physical security system that allows these priceless documents to be displayed during the day and housed in the safety of secure vaults overnight. Diebold was recently named the country's second largest security systems integrator by Security Distributing and Marketing magazine.

Founded in 1859 as a security equipment company, Diebold is a world leader in providing physical and electronic security systems, facility transaction products and automatic teller machines (ATMs) that integrate security, software and self-service transactions, providing total systems solutions to financial, commercial and government markets. Specialized applications include card systems, which can boost productivity, convenience and security in the corporate and government environments. During the past decade, Diebold has also been the primary supplier for all of the country's federal reserve banks, which include seven bank sites and more than 20 vault doors.

# CLASS 6 SECURITY FILING CABINETS

# CLASS 6 SECURITY FILING CABINETS

## CLASS 6 SPECIALTY SECURITY FILING CABINETS

Class 6 Short Depth Cabinets and Field Safes are GSA-approved under Federal Spec AA-F-358

Affords protection for:

- 30 man-minutes against covert entry
- 20 man-hours against surreptitious entry
- No forced entry requirements

Both Short Depth Cabinets and Field Safes are available in:

- Gray
- Black
- Parchment
- Wood Grain (additional lead time and cost)

Short depth:

The short depth container is approved for safeguarding classified material and is specifically designed and constructed for use in mobile or transportable tactical assemblages-(the one drawer short depth is the only GSA approved container available with mounting holes pre-drilled in the bottom).

Short depth Cabinets are equipped with locks meeting Federal Specification FF-L-2740

Field Safes:

- Field safes are approved for safeguarding classified material and are specifically designed and constructed for use in military units in the field.
- Carrying handles, hinged front and rear, raise to a 90° angle for easy handling.
- Available with single lock or dual lock.

# CLASS 5 WEAPONS STORAGE

## CLASS 5 WEAPONS STORAGE CONTAINERS

Class 5 Weapons Storage Containers are GSA-approved under Federal Spec AA-C-2859

Affords protection for:

- 30 man-minutes against covert entry
- 10 man-minutes against forced entry

GSA Class 5 Weapons Storage Containers are designed for the secure storage of rifles, pistols of most calibers, riot shotguns and shoulder fired automatic weapons and ammunition.

There are many available options with the Weapons Storage containers.

The universal pull-out cart is designed to hold 32 shoulder fired weapons (M-14, M-16, 870 Riot Shotguns, Marksmanship Rifles, etc). Two full depth ammo trays equipped with hasps are factory installed when ordering the container equipped with the cart at no additional charge. The State Department pull-out cart is a specialty cart for use with shoulder fired weapons as well as pistols.

Various drawers, safes, shelves, etc., are also available for the “no interior” cabinets. The standard configuration for storage of weapons is seven drawers. This provides sufficient vertical height for most weapons to be stored within the drawer. A maximum of nine drawers can be installed, but is not recommended for weapons storage due to the drawer height restrictions.

Weapons Containers are available in:

- Gray

# SUPPLEMENTAL CONTAINERS

## SUPPLEMENTAL SECURITY CONTAINERS

### General Information on Supplemental Security Containers:

- Containers are available in gray color only
- All containers are equipped with UL (Underwriter's Laboratories, Inc.) Group 1R Mechanical Combination Locks
- For use in conjunction with GSA approved security equipment
- These units do not carry a Class 5 or Class 6 rating as they are intended to be "supplemental."

Description: SCC-1215 Supplementary Container  
 Shipping Weight: 35 lbs.  
 Unpacked Weight: 32 lbs.  
 Shipping Dimensions: 12.75"H x 16.25"W x 12.25"D  
 Outside Dimensions: 12"H x 15"W x 10"D  
 Cubic Feet: 1.47

Diebold Part No: M9-019730-0A01  
**SIN: 489-161**

For use within a GSA approved filing cabinet. Construction: 11 gauge steel, a recessed continuous hinge and an 1/8" steel door. Has a top load style door

Description: SCD-1259 Security Card Drop  
 Shipping Weight: 22 lbs.  
 Unpacked Weight: 20 lbs.  
 Shipping Dimensions: 14.5"H x 10.25"W x 11"D  
 Outside Dimensions: 12 3/16"H x 7.5"W x 8.25"D  
 Cubic Feet: 0.95

Diebold Part No: M9-019740-0A01  
**SIN: 489-161**

For use as a secure "depository" for key cards. When mounted in a manned or protected area, it is approved by the National Security Agency for storage of classified materials. Construction: 11-gauge steel, shielded slot protected by an anti-fish saw tooth baffle

Description: GL-1259 Utility Locker (Empty)  
 Shipping Weight: 18 lbs.  
 Unpacked Weight: 16 lbs.  
 Shipping Dimensions: 12"Hx12"Wx16"D  
 Outside Dimensions: 8.25"H x 5.25"W x 12 3/16"D

Diebold Part No: M9-01960-0A01  
**SIN: 489-157**

The Utility locker is a versatile, secure storage unit. Its compact size permits one to four units to fit neatly inside a standard, legal size Class 6 GSA cabinet. Provides individual control, compartmentalization and practical use of drawer space. Ideal for securing keys, handguns, evidence, money, etc. The top is removable for easy access.

Available with key rack insert. Rack features 6 flip panels with 7 key hooks each. The unit fits perfectly inside the protective utility locker.

# SUPPLEMENTAL CONTAINERS

## SUPPLEMENTAL SECURITY CONTAINERS

Description: SC-1612 Wall Cabinet with Four Shelves  
 Shipping Weight: 51 lbs.  
 Unpacked Weight: 48 lbs.  
 Shipping Dimensions: 18"H x 14"W x 9"D

 Cubic Feet: 1.31

Diebold Part No: M9-019720-0A01  
 SIN: 489-160

The High Security Wall Cabinet comes with four shelves for secure storage of items other than keys. The SC-1612 mounts easily to the wall to keep stored items at your fingertips yet off limits to unauthorized personnel. Constructed of 1/8" Steel with a group 1R combination lock. A recessed full length hinge, in conjunction with an interlocking jamb, protects the hinge side of the door.

Description: KC-1612 Wall Key Cabinet with Rack  
 Shipping Weight: 53 lbs.  
 Unpacked Weight: 51 lbs.  
 Shipping Dimensions: 18"H x 14"W x 8.5"D  
 Outside Dimensions: 16 1/2"H x 12"W x 6 3/8"D  
 Cubic Feet:

Diebold Part No: M9-019700-0A01  
 SIN: 489-159

The high security wall key cabinet provides protection for restricted access keys. The KC-1612 mounts easily to the wall to keep these keys at your fingertips yet off limits to unauthorized personnel. Cabinet capacity is 179 keys. The body is constructed of 1/8" Steel. A recessed full length hinge, in conjunction with an interlocking jamb, protects the hinge side of the door.

Description: KL-749 Key Locker- Empty  
 Shipping Weight: 11 lbs.  
 Unpacked Weight: 10 lbs.  
 Shipping Dimensions: 10"H x 11"W x 7"D  
 Outside Dimensions: 6 3/4"H x 7 7/8"W x 4"D  
 Cubic Feet: 0.45

Diebold Part No: M9-019570-0A02  
 SIN: 489-154

The KL-749 is a compact storage container used for safeguarding limited access keys and other select properties. This lightweight but tough unit is constructed of a 1/8" steel body with a top opening, removable 1/4" steel door. The unit features a UL Listed group 1R combination lock. In addition to keys, the unit is also suitable for the secure storage of evidence, cash, cards, etc. The locker can be secured into your existing security container or can be mounted separately in any convenient location.

# CLASS 5 VAULT DOORS

## CLASS 5 VAULT DOORS AND DAYGATES

Class 5 Vault Doors are GSA-approved under Federal Specification AA-D-600

Affords protection for:

- 30 man-minutes against covert entry
- 20 man-hours against surreptitious entry
- 10 man-minutes against forced entry

Features an interlocking jam design and eight 7/8 x 7/8 square active locking bolts. An escape device is attached to the inside integral face of the door to allow persons inadvertently locked inside the vault a means of escape. An optical device is optional to permit observation from the inside of the vault to the unsecured area.

The daygate is constructed of expanded metal supported by a sturdy steel angle frame. The full height design, with keylock outside and a thumb latch release inside, provides controlled access during the hours of operation when the vault door is open.

Complete drawings are available for each unit.

# X-09 ELECTROMECHANICAL LOCK

## FEATURES

Make your safe the SAFEST with the X-09 electromechanical lock. Approved by the GSA for use on approved Class 5 and Class 6 filing cabinets. The X-09 is self-powered using PowerStar™ technology (an internal self-activating power plant) introduced by Kaba Mas, and features a limited view LCD display.

A twist of the dial provides all the power necessary to enter the combination as well as review audit features. The X-09 provides all the benefits of high security electronic locking while maintaining the reliability of a mechanical lock, independent of batteries or outside power sources. Its security with a twist.

Since the X-09 isn't subject to mechanical limitations, it provides a far superior solution for your container needs. Advanced Engineering assures that X-09 entry codes cannot be compromised by observing the dial position. Plus, the tamper-resistant X-09 cannot be "hacked" because the digital information is hidden in the processor's non-volatile memory.

The X-09 features multiple modes of user access and audit features. These user friendly locks provide virtually maintenance free operation and features Kaba Mas' exclusive Powerstar™ technology.

## APPLICATIONS

We have integrated the X-09 technology with a rim deadbolt platform to represent a unique and complete high security door lock solution while complying with most safety requirements.

### THREE MODES OF OPERATION

SINGLE COMBINATION MODE:

Allows access by dialing a six digit combination

DUAL COMBINATION MODE:

Allows access only when two separate codes are entered within (10) seconds of each other.

SUPERVISORY/SUBORDINATE MODE:

Allows access to a subordinate only after a supervisor code has been entered.

### AUDIT FEATURES

The X-09 has auditing features, including a non-resettable openings log, and unsuccessful attempts log (audits after 3 unsuccessful attempts) that resets once the proper access code is entered.

### POWERSTAR™ TECHNOLOGY-

The X-09 features Kaba Mas' exclusive PowerStar™ technology which generates its own electric energy with each turn of the dial. No batteries, wires or hassles. It's electronic access control with a twist!

# X-09 ELECTROMECHANICAL LOCK

## SPECIFICATIONS

### Hardware Specifications:

Power: Internal, self powered by PowerStar™ technology

Combination Modes:	Single: 1 million combinations Dual: 500 billion combinations Supervisor: 2 million combinations
Direct Dial:	No need to clear before entering combination. Once you stop top turning the dial, the power will shut down after 40 seconds.
Dead Zones:	None
Memory:	Non-volatile
LCD:	Limited view liquid crystal display with indicator arrows makes dialing easy and exact.
Combination Changes:	LCD Indicators in change key mode. Combination changed with correct combination or serial number.
Random Number View:	True scramble
Daylocking:	No
Back Dialing:	No
Lock Reset:	Automatic when bolt is thrown or 40 seconds after turning has stopped.
Manipulation:	Secure against high-voltage attack, robot attack, X-ray method, magnetic, vibration and R/F.
Audit:	The X-09 records all openings and the record is non-resettable. It will record unsuccessful attempts after 3 incorrect combination attempts and re-sends after a correct opening.
Wrong Try Penalty:	Ten to fourteen errors result in a 3 minute time out. Fifteen errors or greater result in a 4 minute time out. Both error count and penalty time reset with valid combination.

### Environmental Performance:

Temperature:	Tested -10°F to 155°F Operational Range
Salt Spray:	Operational after 72 hours of continuous exposure (per ASTM B117-90)
High R.P.M:	Not operational after 4 hours in each direction at 600 R.P.M. Fails secure.
Cycle Test:	Meets or exceeds FF-L-2740A specifications.
Humidity:	Operational after 10 days of 140°F @ 98% humidity. (Operational after 10 days testing per MIL-STD-810E, Method 507.3, Procedure III, Temperature Cycling 86°F to 140°F @ 98% RH).
Stress:	Operational after 7 days in a stress chamber @ 194°F. Meets FF-L-2740A specification
Vibration:	MIL-STD-810
Shock:	MIL-STD-901
Electrical Discharge:	250KV on dial
Electromagnetic Pulse:	Meets FF-L-2740A specification for simulation of high altitude nuclear blast. Case & Bolt Strength: 600 pounds in two directions.
