Empowering Seamless Self-Service Banking Solutions

Smart Teller Machine (STM)

The Smart Teller Machine (STM) is a **state-of-the-art banking** terminal powered by **QMatch** – Digital Platform that transforms traditional counter operations into efficient self-service experiences. Designed for customer convenience, STM integrates complex banking services with intuitive, user-friendly interfaces.

Key Benefits

- ✓ Versatile Services: Supports account opening, card issuance, cheque deposits, and more.

Key Features & Functionalities

Open New Accounts: Streamlines customer onboarding with instant ID card and biometric verification.

Document Scanning: Facilitates document verification by enabling seamless scanning of passports, ID cards, pay slips, bills, and proof of address.

Instant Card Issuance: Provides debit or credit cards immediately after onboarding.

Cheque Deposit: Uses advanced imaging technology for fast, secure processing

Account Statement Printing: Enables customers to print statements on demand

Remote Assistance: Integrates human teller support for complex queries.

Technical Highlights

Dual-Sided Cheque Imaging: Ensures accuracy and efficiency.

Biometric Authentication: Ensures accuracy and efficiency.

Modular Design: Easy to deploy in branch lobbies or 24-hour zones.
